Fast Park provides 220 extra hospital bays

Chorley & South Ribble District General Hospital is increasing its parking capacity by use of a pre-fabricated modular car park deck. The trust reviewed its parking requirements and concluded it needed to provide a 220-space car park. The available land was an unmade, undulating, terraced, greenfield site. The Trust decided to install a Fast Park deck. The completed car park was opened to public, staff, patients and visitors after just three months' work. www.fastpark.com
