Fast Park Sistema Stand P74

Fast Park will be demonstrating how to double the capacity of a surface car park by erecting a modular steel deck. The Rome-based company has installed hundreds of decks at hospitals, airports, railway stations, shopping centres and in towns across Europe.

The Fast Park system is offered as a turn-key package, simplifying procurement, supply, construction and commissioning for clients. The modular

they can be changed, removed or relocated when necessary.

"Business development cannot always be predicted, so the ability to enable speedy changes in response to market or business dynamics is an asset," said UK agent David Lentz. "The facility to relocate has been successfully demonstrated on a number of occasions, conspicuously with a move from Rome to Milan airport at two railway stations in Belgium and two locations in Belgrade."
